Time					
06:00	09:00	12:00	15:00	18:00	21:00
Heavy Rain	Thunderstorm	Heavy Rain	Heavy rain showers	Light rain showers	Light rain showers (night)
Precipitation probability					
80%	80%	80%	60%	40%	40%

Forecast for Friday 22 Sep 2023

Weather: Another showery, windy and unsettled day. Scattered showers becoming widespread for a time mid-morning and possibly merging to give longer spells of rain. Showers may turn heavy at times, with a risk of hail and thunder. More in the way of sunny intervals developing later as the intensity of the showers starts to wane, with these becoming mainly confined to the north and west into the evening, with the south and east drier.

Chance of cloud-free hill tops above 800m: 30% improving 70%.

Low Cloud and visibility: Very good visibility generally, but falling to moderate or poor in showers. Bases 600m in heavier showers, especially through the morning. Where showers merge to give longer spells of rain, cloud may obscure higher routes for a few hours.

Freezing Level*	1700m	1700m	1700m	1800m	1500m	1500m	1500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

The risk of blustery showers and of heavy downpours or thunderstorms, mixed with poor visibility could lead to conditions deteriorating quickly and make for challenging navigation at times.

Forecast for Saturday 23 Sep 2023

Weather: A cool, crisp and sunny start. Cloud will gradually increase through the day, but it will remain dry through daylight hours. Rain is likely to arrive from the west towards midnight. Wind gradually increasing through the day, becoming strong late afternoon and into the evening. Feeling cold on the summits, particularly as winds increase.

Maximum wind: Westerly 15 mph gusting 25 mph much of the day, then southerly 25 mph gusting 40 mph by late evening.

Chance of cloud-free hill tops above 800m: 90%

Low Cloud and visibility: The odd localised mist or fog patch is possible in valleys at first, otherwise mostly just high cloud during the morning, well above the summits. Cloud will increase during the morning, lowering to around 800m by early afternoon, and then lowering further towards 600m later. Very good visibility throughout the day, deteriorating to moderate as rain arrives later.

Temperature: **Valleys:** Plus 6 Celsius becoming plus 13 Celsius
At 800m: Plus 5 Celsius
Freezing level: Above the summits
